Stayzsafe
SANITISER & PROTECTANT

Stayzsafe
SANITISER & PROTECTANT

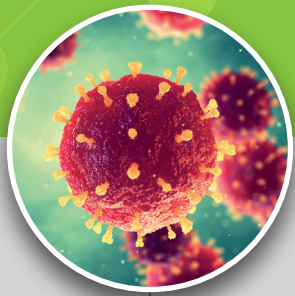

THESE AREN'T THE ONLY
PASSENGERS TRAVELING
IN YOUR CAR

Along with your family, these chaps are hitching a lift!

Say goodbye to unwanted passengers with Stayzsafe and help protect you and your family. Stayzsafe is a 3 in 1 vehicle shield protecting against Bacterias, Flu Viruses and Allergies.

In less than 6 minutes the Stayzsafe Antimicrobial Shield can not only sanitise the whole interior of any vehicle, but offer up to 12 months protection against pathogens such as bacteria, viruses, fungus and parasites.

STAYZSAFE ANTIMICROBIAL SHIELD

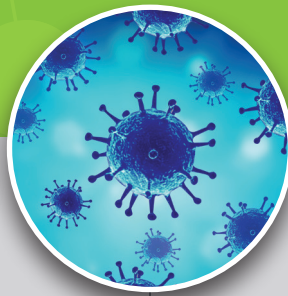

Pathogens

Microscopic organisms which spread bacteria and cause illness, typically know as E Coli, Hepatitis A, Salmonella, Shigella and Typhil.

Viruses

Small infectious agents that spread from person to person from all surfaces such as Norovirus.

Bacteria

Harmful bacteria causes the most illness, hospitalisation and deaths in the United Kingdom.

Stayzsafe
SANITISER & PROTECTANT

How does Stayzsafe Antimicrobial Shield work?

Stayzsafe once applied, forms an invisible barrier on all the surfaces of the interior of your vehicle and its air-conditioning system, immediately sanitising and eliminating harmful microbes and bacteria present.

A layer of microscopic pins coats the surface and kills the pathogens by piercing and rupturing their cell walls. Stayzsafe therefore kills germs by 'mechanical' means and is non-toxic. All currently known superbugs are defenceless against our cell wall rupture technology.

The Anti-Microbial barrier is like a grass lawn with countless blades of grass that rupture or pop the bubble-like cell wall of the microbes, destroying them on contact.
